

Ask about our Mortgage Check-up

Millions of Americans are paying far more than they should in monthly mortgage payments.

Are you?

How long have you been making payments on your home mortgage? If you are like most people, more than likely, you know exactly what your payment is each month.

But, do you know what your actual rate of interest is on your mortgage? Do you remember just how long your term is? Do you know if your interest rates and monthly payments may increase, or when, or by how much?

At CorePlus Federal Credit Union, we understand that many people aren't sure of the answers to these and many other important questions about their mortgage financing. That's why we have created the "mortgage check-up".

It's a smart, fast simple way for you to stop and take a careful look at what may be your most valuable asset... and discover if there are ways to do better... save more... and perhaps take advantage of the equity you have in your home or build equity faster than you are now.

Mortgage Check-up
